

SARVESH KUMAR SINGH

Full Stack MERN Developer | AI/ML Enthusiast

Prayagraj, Uttar Pradesh, India | +91 6392867714 | sarveshkhkumarsingh6@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack MERN Developer and aspiring ML Engineer pursuing a Bachelor of Computer Applications (BCA) from the University of Allahabad (Expected May 2026, GPA: 7.8). Proficient in building responsive, scalable web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and Tailwind CSS. Delivered 3+ full-stack real-world projects including an AI-powered test platform, an algorithm visualizer, and a women safety application. Strong foundation in REST API design, CI/CD deployment, Agile workflows, and problem-solving. Active Google Campus Ambassador and Smart India Hackathon (SIH 2026) participant. Open to remote and on-site opportunities across India.

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, Python,
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, CI/CD, Agile Development
- **Databases:** MongoDB, MySQL
- **AI / ML:** Python, NumPy, Pandas, Scikit-Learn, Machine Learning
- **Tools & Platforms:** Git, GitHub, Vercel, Render, Postman, VS Code, Jupyter Notebook

WORK EXPERIENCE

GOOGLE CAMPUS AMBASSADOR | Google

September 2025 – January 2026

Prayagraj, India

- Represented Google programs and developer initiatives to a campus community of 2,000+ students, increasing awareness of Google tools and platforms by 60%.
- Organized and led 5+ technical workshops and developer sessions, directly engaging 300+ student peers in hands-on learning activities.
- Collaborated with 3+ student communities to drive technical events, resulting in a 40% increase in developer program participation on campus.
- Strengthened leadership, communication, and cross-functional collaboration skills by coordinating with Google's regional team on campus initiatives.

SMART INDIA HACKATHON (SIH 2026) | Participant

2026

Problem Statement: Veterinary and Breed Identification System

- Engineered an AI-powered veterinary assistance system for animal breed identification, achieving 85%+ prototype accuracy using ML classification models.
- Collaborated in a 6-member cross-functional team, contributing to UI design, system architecture, and agile sprint execution within a 36-hour hackathon window.
- Delivered a working prototype with a functional front-end interface and a backend ML inference pipeline within the competition timeline

PROJECTS

MockMaster — AI Mock Test Generator | [LIVE](#) | [GITHUB](#)

React.js · Node.js · Express.js · MongoDB · Tailwind CSS

- Architected and deployed a full-stack AI-powered mock test platform with dynamic question sets, real-time scoring, and user dashboards — serving 100+ active test sessions.
- Built a responsive React.js front-end with Tailwind CSS, reducing page load time by 35% through code splitting and lazy loading optimizations.
- Designed and implemented 15+ secure RESTful API endpoints using Node.js/Express.js with JWT authentication and MongoDB for persistent data storage. deployed on Vercel (frontend) and Render (backend) with CI/CD pipeline, cutting deployment time by 50% and enabling continuous delivery of new features.

AlgoVision — Algorithm Visualizer | [LIVE](#)

React.js · TypeScript · Tailwind CSS

- Built an interactive web platform visualizing 10+ sorting and searching algorithms (Bubble, Merge, Quick Sort, Binary Search) with smooth step-by-step animations.
- Engineered 60fps animated visualizations using optimized React state management, improving algorithm comprehension for 200+ student users.
- Achieved 95+ Lighthouse performance score through frontend optimization, lazy rendering, and responsive design across all major browsers and devices.

Nirbhaya — Women Safety Application | [GITHUB](#)

MERN Stack ,Node.js · JWT Auth · Twilio API

- Developed a full-stack women safety application with emergency SOS alerts, real-time GPS location sharing, and automated contact notifications via Twilio API.
- Reduced emergency response trigger time to under 2 seconds through optimized API integration and real-time event handling.
- Implemented JWT-based authentication with bcrypt password hashing, securing user data for 50+ registered test users during development phase.

EDUCATION

Chaudhary Mahadeo Prasad Degree College, University of Allahabad

Bachelor of Computer Applications (BCA); GPA: 7.8 / 10

Prayagraj, India

October 2023- May 2026

Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Web Technologies, Fundamentals of Data Science, Operating Systems

CERTIFICATIONS

MERN Stack Development Course | Apna College | CERTIFICATE

2024

- Completed full-stack development training covering React.js, Node.js, Express.js, MongoDB, REST APIs, and deployment best practices.
- Built and deployed 2 end-to-end capstone projects demonstrating proficiency in the complete MERN stack development lifecycle.
